Short company description

We create impactful end-to-end digital products and solutions that result in relevant, memorable and rewarding interactions between brands and consumers. Delivering sustainable innovation, agility and a connection that inspires engagement and business transformation, we've worked with some of the world's largest leading brands like Estee Lauder, Groupon, Microsoft, Macy's, Mozilla, Lululemon, Neiman Marcus, among others. Cognizant Softvision has over 10,000 product, design and engineering professionals across a network of 20 studios in 11 countries and 5 continents.

In Romania, we have been present since 1998 and we have continuously grown over the years into a powerful team of more than 1800 employees. With Studios in Bucharest, Cluj-Napoca, Iași, Timișoara, and Baia Mare we embrace both IT professionals with strong software development skills and experience as well as young talented people, willing to learn, to develop their career and oriented towards success.

With a unique approach that helps us deliver sustainable innovation and business transformation for the world's leading brands improving their digital maturity. We work at the intersection of engineering, design, and strategy, to help our customers create game-changing digital experiences with our client-dedicated teams.

Requirements

- Strong understanding of JavaScript, its quirks, and workarounds
- Knowledge of advanced JavaScript libraries and frameworks such as AngularJS, React JS, KnockoutJS, BackboneJS, EmberJS, NodeJS etc.
- JavaScript unit testing frameworks (prefer Unit.js, Mocha, Jasmine)
- Understanding of code versioning tools, such as {GIT / Mercurial / SVN}
- Very Good English communication skills (both verbal and written)
- Client communication experience

Responsibilities

- Develop and provide solutions on JavaScript frameworks
- Develop high-traffic, flawless web applications using JavaScript
- Participate in code and design reviews to ensure consistency in architecture and design/code practice
- Code with performance, scalability, and usability in mind
- Work on new tools in leading industry trends, with new and emerging technologies, prototypes and engineering process improvements
- Work closely with next generation architecture development teams using cutting edge approaches and technologies

[VEO Worldwide Services](#)

Scurta descriere a companiei

Suntem o companie specializată în oferirea de servicii B2B, acoperind o arie largă de domenii în care activează clienții noștri internaționali: Comercial, Financiar-Contabil, Resurse Umane, Logistică și Transport, Support și Dezvoltare IT.

Ce îți propunem ? Provocări, zi de zi! Provocarea de a te adapta unei companii care crește anual cu peste 80%, provocarea de a fi într-o permanentă competiție cu tine însuși, provocarea de a lua proiecte de la 0 și de a le da un sens!

Îți încurajăm spiritul antreprenorial, creativitatea și ideile originale. Îți oferim posibilități de dezvoltare a carierei, training-uri la nivel internațional care să te ajute să devii un profesionist din ce în ce mai bun, dar și sprijin personal, solidaritate în momentele dificile.

Dacă îți dorești un angajament pe termen lung, iar provocările nu te sperie, ci sunt impulsul care te împinge spre birou zâmbind, te invităm să ne cunoaștem și să vorbim despre cariera ta!

Cerinte

Ne-ar placea sa:

- ai peste 1 an de experienta anterioara în domeniul economic (experienta în analiza de indicatori/ raportare sau audit reprezinta un avantaj);
- esti utilizator experimentat de Excel (utilizare a formulelor de calcul);
- esti o persoana riguroasa, cu spirit analitic si capacitate de sinteza, pasionata de cifre si acorzi atentie detaliilor;
- cunosti limba engleza la nivel mediu-avansat.

Responsabilitati

Echipa de Reporting&Controlling Iasi cauta un coleg dornic sa exploreze lumea cifrelor!

Daca dorinta de perfectionare continua te defineste, iar dificultatile din formulele Excel nu sunt decât un puzzle pentru tine, daca ai capacitate de sinteza si te captiveaza ideea de analiza a evolutiei indicatorilor de performanta, te asteptam în echipa noastra!

Principalele tale misiuni vor fi:

- Realizarea de rapoarte de analiza economico-financiara.
- Analiza cifrei de afaceri, a costurilor, a rentabilitatii investitiilor.
- Colectarea si sintetizarea datelor preliminare în vederea elaborarii rapoartelor.
- Monitorizarea gradului de atingere a obiectivelor specifice fiecarei activitati.
- Realizarea si prezentarea de analize/ rapoarte punctuale la solicitarea managementului.

Alte informatii

Îi pentru c? valorific?m implicarea ?i dorin?a de a înv??a, oferim urm?toarele beneficii:

- + Pachet care include beneficii financiare ?i non-financiare;
- + Benefit - platforma online pentru beneficii – reduceri magazine, activit?i sportive, asigur?ri medicale, seven cards etc;
- + Training ini?ial ?i periodic specific activit?ii desf??urate;
- + Reale oportunit?i de dezvoltare a unei cariere într-un mediu profesionist, al?turi de o echip? dinamic? ?i de succes;
- + oportunitate de a activa într-o companie interna?ional?, cu sedii în 7 ??ri.

[UniCredit Bank](#)

Scurta descriere a companiei

In Romania, UniCredit Bank este una dintre principalele institutii financiare, oferind servicii si produse de inalta calitate pentru toate categoriile de clienti. UniCredit Bank isi propune sa mentina permanent clientul in centrul activitatilor sale, sa fie un partener cu care se lucreaza usor si sa fie o parte foarte activa a comunitatilor in care isi desfasoara activitatea.

Cerinte

Ce te recomandă?

Pasiunea față de tehnologie, în special pentru aplicațiile mobile și tehnologiile digitale de banking
Bune abilități de comunicare, planificare și organizare, precum și o orientare către disciplina în execuție prin respectarea termenelor stabilite

Ce atuu ai?

Team spirit și o atitudine de tip "can-do"
Capacitate de învățare continuă

Responsabilitati

Ești pasionat de tehnologie și banking?

Dacă împărtășim aceeași pasiune, te așteptăm să faci parte din echipa noastră de interni pentru următoarele două luni.

Vei avea ocazia să te familiarizezi cu tehnologia bancară și ulterior să o prezinți clienților.
Vei fi ambasadorul nostru pentru produsele digitale pe care le punem la dispoziție clienților.

Orientarea tehnică și abilitățile tale de comunicare vor fi suficiente, iar de training ne ocupăm noi. Vor fi două luni pline cu experiențe de învățare, de la cursuri de vânzări, la prezentări ale diverselor arii din bancă, precum și cursuri soft-skills pentru o dezvoltare profesională și personală cât mai cuprinzătoare.

Dar cum arată un Internship la UniCredit?

Dacă te alături programului, vei parcurge un training inițial pentru a "intra în ritmul UniCredit" cât mai repede și care îți va pune la dispoziție foarte multe resurse pentru a face acest lucru cât mai rapid și plăcut.

Ulterior, vei lucra direct cu specialiștii noștri și vei înțelege conceptele utilizate în banking și activitățile desfășurate.

Aplicația de Mobile Banking va fi centrul atenției tale: vei învăța totul despre cum funcționează și cum îi poate ajuta pe clienții noștri să își schimbe modul în care fac banking.

Vei avea ocazia să promovezi aplicația clienților noștri, să le oferi suportul în a o instala și configura corect și îi vei ajuta în rezolvarea cerințelor digitale pe care le au.

Alte informatii

Bucura-te de un program prin intermediul căruia, pe parcursul lunilor august și septembrie vei descoperi lumea bancară și vei fi promotorul noului mod de a face banking.

Nu da skip acestei oportunități!

#dowhatmatters Vino și tu în echipa UniCredit!

Short company description

bitExpert - Our pulse is cross-technology software development that beats with every line of code. Join our international team of more than 80 colleagues. As different as we are, we all have one thing in common – the curiosity about technology and knowledge. We are an experienced, motivated, purposeful and cheerful team that is always looking forward to new challenges.

We

- are a growing company focusing on web-development
- provide future-oriented software-development with modern methods and tools
- work together with international enterprises, owner-operated companies and digital and communication-agencies
- believe in maximum flexibility (work-location, work-hours, topics, methods)

- have high quality standards
- support your personal and professional growth
- welcome your input
- collaborate in small teams with shallow hierarchies

Requirements

We are recruiting for our growing office based in Bucharest a PHP Senior Developer. This job can be done also remotely.

Requirements:

You convert ideas to code and you like to build tools
 You have experience in the development of web and mobile applications in PHP (Symfony, Zend or Laminas)
 You feel at home in frontend technologies like HTML5, CSS3 and JavaScript
 You dabbled a bit with tools like Docker or Rancher
 You have experience using automated testing (unit tests, integration tests, frontend/UI tests)
 You have experience with technologies like Node.js, OpenAPI, React.js, ExtJS
 You like to learn constantly and to use new (web) technologies
 You like to be part of a team and to bring new ideas of improvement
 You have experience of understanding of databases and data structure like MongoDB
 You should have a Bachelor degree in Computer Science or experience in a related field
 You speak English fluently, then you are the best match for us

Responsibilities

Responsibilities:

You will develop modern Software and web-projects applications together with our team from Germany
 You will develop web and mobile applications according the standardized agreed development framework
 You have knowledge of relational data base structure in a multinational environment
 You worked with other experts on future-oriented and state-of-the-art web technologies
 You have experience with the entire process of development (conception, implementation, testing, service and optimization) in different fields, for example of Image Campaign, eCommerce and Business Processes
 You have experience in testing and verifying quality of delivery products

Nice to have skills:

Knowledge of Git
 Fluency in other language, for example German, is a plus
 Availability for business travels

Other info

What we offer:

Competitive compensation International team of motivated and experienced people
 Opportunity to learn and grow
 Occasional work from home, flexible working hours
 Occasional travel abroad
 Opportunity to implement future-oriented integrated software solutions using modern tools and methods
 We collaborate in small teams with shallow hierarchies
 We cooperate with international organizations, medium-sized businesses and digital agencies as well as agencies for marketing & PR communications

Scurta descriere a companiei

We create impactful end-to-end digital products and solutions that result in relevant, memorable and rewarding interactions between brands and consumers. Delivering sustainable innovation, agility and a connection that inspires engagement and business transformation, we've worked with some of the world's largest leading brands like Estee Lauder, Groupon, Microsoft, Macy's, Mozilla, Lululemon, Neiman Marcus, among others. Cognizant Softvision has over 10,000 product, design and engineering professionals across a network of 20 studios in 11 countries and 5 continents.

In Romania, we have been present since 1998 and we have continuously grown over the years into a powerful team of more than 1800 employees. With Studios in Bucharest, Cluj-Napoca, Iasi, Timisoara, and Baia Mare we embrace both IT professionals with strong software development skills and experience as well as young talented people, willing to learn, to develop their career and oriented towards success.

With a unique approach that helps us deliver sustainable innovation and business transformation for the world's leading brands improving their digital maturity. We work at the intersection of engineering, design, and strategy, to help our customers create game-changing digital experiences with our client-dedicated teams.

Cerinte

- Strong understanding of JavaScript – ReactJS and its core principles
- Strong knowledge of HTML5, JQuery, CSS3
- Experience using libraries such as D3 to manage huge data sets that need to be presented rapidly
- Experience integrating with RESTful web services/APIs, Auth0 and others
- Familiar with the various software development methodologies (SCRUM, Agile, etc.)
- Must be able to work well in teams and in a very collaborative environment

- Very Good English communication skills (both verbal and written)
- A natural curiosity for new scripting languages, frameworks and technologies

Responsabilitati

- Develop and provide solutions on JavaScript and ReactJS framework
- Develop high-traffic, flawless web applications using JavaScript
- Participate in code and design reviews to ensure consistency in architecture and design/code practice
- Code with performance, scalability, and usability in mind
- Work on new tools in leading industry trends, with new and emerging technologies, prototypes and engineering process improvements
- Work closely with next generation architecture development teams using cutting edge approaches and technologies.

Scurta descriere a companiei

bitExpert - Our pulse is cross-technology software development that beats with every line of code. Join our international team of more than 80 colleagues. As different as we are, we all have one thing in common – the curiosity about technology and knowledge. We are an experienced, motivated, purposeful and cheerful team that is always looking forward to new challenges.

We

- are a growing company focusing on web-development
- provide future-oriented software-development with modern methods and tools
- work together with international enterprises, owner-operated companies and digital and communication-agencies
- believe in maximum flexibility (work-location, work-hours, topics, methods)
- have high quality standards
- support your personal and professional growth
- welcome your input
- collaborate in small teams with shallow hierarchies

Cerinte

We are recruiting for our growing office based in Bucharest a 4GL Progress Technology Developer with both front end and back end technologies experience.

Requirements:

- You are highly motivated to continuously become acquainted with new (web) technologies
- You are willing to work with OpenEdge progress technologies
- You should have organizational and multitasking skills and pay attention to details
- You have the ability to estimate, plan and priorities testing as part of a scrum team
- You should have knowledge and experience with networking technologies such as 4GL Progress technology
- You should have experience in reading and understanding code and developing softwares
- You should have experience working with Java and JavaScript
- You should have experience working with relational data bases like MySQL and PostgreSQL
- You should have a Bachelor degree in Computer Science or experience in a related field
- You speak English fluently, then you are the best match for us

Responsabilitati

Responsibilities:

- You have the ability to multi-task and the desire to learn new technologies
- You will develop modern web and mobile applications with our team from Germany
- You develop web and mobile applications according the standardized agreed development framework
- You worked with other experts on future-oriented and state-of-the-art web technologies
- You have experience with the entire process of deployment process (conception, implementation, manual and automation testing, service and optimization) in the field of Image Campaign, eCommerce and Business Processes or in different industries
- You should understand business requirements in order to write automated tests primarily and occasionally manual exploratory testing as required;
- You have experience in testing and verifying quality of delivery products

Alte informatii

Nice to have:

- Knowledge of Git
- Knowledge of Webservices
- Fluency in other language, for example German, is a plus
- Availability for business travels

What we offer:

- Competitive compensation
- Agile environment
- International team of motivated and experienced people
- Work and development in a multinational environment
- Opportunity to learn and grow
- Occasional work from home and flexible working hours

AMBER STUDIO

Super team leader with great coordination skills ready to move to the next level? We're looking for a QA Project Coordinator in Amber Studio Botosani! ABOUT THE ROLE: The QA Project Coordinator is responsible for ensuring the successful and timely project implementation & support of one or multiple Quality Assurance projects. Leading a team of QA Testers according to the Amber QA Framework, the QA Project Coordinator will effectively manage, plan and track all the testing aspects for the entire span of a project, across multiple platforms.

Responsible for building Trust and Communication between internal teams and the business stakeholders. This role works under direction of the Project Manager.

WE NEED YOU TO:

Plan, Define and Control

- Lead the planning and implementation of project
- Define project tasks and resource requirements
- Production of test plans and Strategies in accordance with the software requirements and design specifications.
- Accurate recording of test activities including identification and tracking of defects
- Analysis of actual results arising from test execution
- Assist in recommending future enhancements and improvements during the test life cycle to improve the effectiveness of the team
- Create and maintain QA tools such as build deployment, performance/memory profiling, gameplay metrics, smoke tests and other automated tests
- Create and supervise QA assignments and provide status reports to project leadership
- Present reports defining project progress, risk registry and mitigation plan
- Establish a communication schedule to update stakeholders including appropriate staff in the organization on the progress of the project

Lead, Develop, Empower

- Integrate and develop culture. Build inspiration and engagement for your team
- Understand and develop the strengths of team members, encouraging them to make the best of their abilities.
- Sets clear, realistic goals, objectives and performance standards for self and the team.
- Train, coach and help in the development of QA Testers and QA Test Specialists in test processes and business procedures
- Manage individual performance of the QA Testers and QA Test Specialists conducting one to ones, giving feedback on performance, conducting performance appraisals, absence management and managing resource requirements.
- Identifies and manages poor performance in a timely and effective manner.
- Delegates fairly and evenly across the team, matching the activity to the individual based on workload, personal strengths and development needs.
- Gives feedback (both positive and negative) in a constructive manner.

REQUIRED QUALIFICATIONS:

- 3+ years of experience in Quality Assurance or Software Development
- Knowledge of Project Management techniques and tools
- Direct work experience in project management capacity
- Demonstrated experience managing and coordinating large technical teams
- Proven experience in Risk Management

NICE TO HAVE:

- Experience supporting projects or operations of a large IT organization

- Experience supporting Software Development Life Cycle
- PMP practical experience
- ITIL Foundation Level certification

WHAT WE OFFER:

- An attractive salary
- Meal tickets
- A permanent contract
- Medical services package
- Fresh fruits and coffee all day long
- Professional and friendly working environment

AMBER STUDIO

We are looking for a QA Project Manager in Amber Studio Botosani! The role oversees the planning, implementation, and tracking of one or multiple projects from the early levels of engagement, to Live and beyond through clear and specified deliverables. We need you to:

Plan the project

- Lead the planning and implementation of project.
- Facilitate the definition of project scope, goals and deliverables.
- Define project tasks and resource requirements.
- Develop full scale project plans.

Staff the project

- Recruit, interview and select staff with appropriate skills for the project activities.
- Manage project staff according to company policies and practices.
- Ensure that all project personnel receive proper orientation and professional development.
- Assemble and coordinate project staff.

Implement the project

- Execute the project according to the agreed plan.
- Monitor the progress of the project and adjust as necessary.
- Establish a communication schedule to update stakeholders and team members on project progress.
- Recurrently review the quality of the work completed with the team to ensure that it meets the project standards.

Control the project

- Constantly monitor and report on progress of the project to all stakeholders.
- Present reports defining project progress, risk registry and mitigation plan.
- Manage all project funds according to established accounting policies and procedures.
- Track project deliverables using appropriate tools.
- Provide direction and support to project team.
- Implement and manage project changes and interventions to achieve project outputs.

Evaluate the project

- Ensure that the project deliverables are on time, within budget and at the required level of quality.
- Evaluate the outcomes of the project as established during the planning phase.

PERSONAL TRAITS

- **Communicate Effectively:** Speak, listen and write in a clear, thorough and timely manner using appropriate and effective communication tools and techniques.
- **Creativity/Innovation:** Develop new and unique ways to improve operations of the organization and to create new opportunities.
- **Foster Teamwork:** Work cooperatively and effectively with others to set goals, solve issues and make decisions that enhance organizational effectiveness.
- **Lead:** Positively influence others to achieve results that are optimal for project and business.
- **Make Decisions:** Assess situations to determine the importance, urgency and risks and make clear decisions which are timely and in the best interests of the organization.
- **Organize:** Set priorities, develop a work schedule, monitor progress towards goals and track details/data/information/activities.
- **Plan:** Determine strategies to move the organization forward, set goals, create and implement actions plans and evaluate the process and results.
- **Solve Problems:** Assess problem situations to identify causes, gather and process relevant information, generate possible solutions and offer recommendations and/or resolve the problem.

QUALIFICATION & REQUIREMENTS

- +2 years planning and/or management experience
- Knowledge of project management techniques and tools
- Direct work experience in project management capacity
- Proven experience in people management
- Proven experience in risk management
- Proficient in project management software

WHAT WE OFFER:

- An attractive salary
- A permanent contract

- Meal tickets
- Medical services package
- Fresh fruits and coffee all day long
- Professional and friendly working environment

Scurta descriere a companiei

bitExpert - Our pulse is cross-technology software development that beats with every line of code. Join our international team of more than 80 colleagues. As different as we are, we all have one thing in common – the curiosity about technology and knowledge. We are an experienced, motivated, purposeful and cheerful team that is always looking forward to new challenges.

We

- are a growing company focusing on web-development
- provide future-oriented software-development with modern methods and tools
- work together with international enterprises, owner-operated companies and digital and communication-agencies
- believe in maximum flexibility (work-location, work-hours, topics, methods)
- have high quality standards
- support your personal and professional growth
- welcome your input
- collaborate in small teams with shallow hierarchies

Cerinte

We are looking for a Support IT Agent with German - Level 1 & 1.5 for our growing Bucharest office.

Compulsory skills:

- English and German fluent (written and spoken)
- Problem solver orientation
- Excellent communication and listening skills
- Team player
- Very good analytical skills
- Eagerness/willingness to learn
- Fast learner
- Ability to perform under pressure
- Ability to multi-task
- Ability to work in 24/7 shifts

Skills, Knowledge & Experience

- Excellent analytic know-how for complex incidents
- Customer facing experience
- Telephone skills with good voice tone and pitch articulation and overall speech quality
- Customer focus
- Positive attitude
- General understanding of IT tools and processes
- Strong communication and teamwork skills
- Ability to learn and apply new technology and methodologies in a distributed environment
- Ability to solve problems quickly and completely
- Knowledge of standard office applications such as MS Office, Windows OS, Lotus Notes and specific client applications

Responsabilitati

Responsibilities:

- Receiving contacts (chats, self-service generated tickets), first-line user liaison
- Identification and authentication of the user, recording of incomplete or incorrect user data
- Opening of an incident/request ticket with clear description in English in the ticketing tool
- Classifying and making an initial assessment of incidents/service requests
- Resolving requests or solving incidents following instructions in a knowledge base. A resolution can also be a work-around of a known error
- Route all Global Service Desk non solvable incidents/service requests to the appropriate second level workgroup, based on agreed service levels

- Keeping users informed on how to get updates on request status and progress via self service
- Call-back function for 2nd level tickets, because of language
- Performing in international software support delivery processes and environments
- Employing client's standard support delivery methodologies and tools
- Maintaining highest client satisfaction
- Applying problem solving techniques
- Analyzing problems/situations, understanding problem impact on client business
- Interacting with client functions consistently until problem solution

Scurta descriere a companiei

Cerinte

Esti omul potrivit daca:

- pui rezultatul obtinut inaintea scuzelor;
- poti gasi solutii atunci cand altii renunta;
- te poti organiza bine singur, faci ce ai zis ca faci si respecti termenele limita;
- poti sa inveti foarte repede si esti rezistent la presiune;
- esti o persona activa;
- te descurci bine cu abilitatile de comunicare si relationare;
- ai initiativa, propui solutii noi de imbunatatire muncii tale (si a celor pentru care esti responsabil).

Ai un avantaj daca esti super-pasionat de IT, stii engleza si ai mai lucrat in domeniu.

Responsabilitati

Responsabilitatile tale dupa absolvire vor fi, in principal:

- verificarea functionarii in parametri normali a sistemelor IT;
- asigurarea managementul incidentelor, troubleshooting prin sistemul de ticketing;
- intelegerea si urmarirea politicilor si procedurilor IT;
- asistenta tehnica prin telefon si e-mail;

Alte informatii

Programul cursului este de luni pana vineri in intervalul orar: 09:00-14:00 , timp de o luna.

In training se tine cont pe toata perioada de urmatoarele reguli:

Orice zi pierduta va fi recuperata de catre cursant de la un alt coleg;

La orice intarziere neanuntata nu veti mai intra in ziua respectiva la curs.

La 4 intarzieri cursantul va parasi cursul;

Exista o singura pauza, la ora 11:00 de 30 de minute sau 2 pauze de 15 minute in intervale stabilite de comun acord;

Absenta nemotivata nu este permisa, sanctiunea fiind parasirea cursului
Se permite maximum o absenta motivata pe saptamana;
Cursul presupune si studiu individual si aprofundarea cunostintelor livrate de catre formator, asadar, la prima tema neefectuata cursantul va primi avertisment, la a doua va parasi cursul;
Materialul de curs CompTIA IT Fundamentals este obligatoriu de studiat.

all jobs Vauban

Short company description

Vauban joined the GFI Group at the beginning of January 2019. With more than 450 consultants in Romania, Vauban is a leading provider of IT services and innovative applications. Created in 2007, the company has experienced strong growth and has established itself as a reference partner for key accounts in the Banking, Telecom, Industry and Energy sectors.

Requirements

- SQL skills, Database concepts and Data Warehouse concepts at an intermediate level
- Practical knowledge of Agile methodologies, especially with practices of writing and prioritizing backlog items (INVEST, DEEP, Value Stream Map, etc....)
- Very good level of English
- At least 2 years of experience in Agile projects, especially data driven projects
- Product Owner experience would be a plus

Responsibilities

The Agile Business Analyst main function is to assist the Product Owner in the daily backlog management (writing of User Stories, validation of User Stories, sorting and prioritization of backlog). He/She cannot replace the Product Owner who is the only one responsible for the backlog and decision making.

- Enlightens with digital experience the solutions imagined by Product Owner (best practices, consistency with market standards...)
- Gives advice on possible improvements in product backlog
- Supports Product Owner in Product Backlog prioritization
- Proposes prioritization adjustment based on the perceived value
- Participates in life cycle of Product Backlog
- Ensures that the Product Backlog is visible, transparent, and clear to all
- Details each selected feature in the form of a User Story small enough to be implemented within one sprint, including acceptance criteria necessary for the team to understand and develop the user story
- Understands and prioritize Technical Stories suggested by the team as well as Defect Stories
- Clarify any User Story upon request from the Development Team during a Sprint
- Participates and contribute to Agile events with the Team
- Contributes to testing User Stories developed by the Agile team
- Accepts or refuses developed Stories (if the Product Owner has granted delegation)
- Evaluates the quality of previous releases and current release in production
- Checks the new release for regression issues

Short company description

20 years' of excellence | Tech expertise | Running mission-critical system | User-centric approach around agile multidisciplinary teams - We combine them with the latest digital innovation to help clients unlock value and thrive in the age of digital transformation, enabling clients to become high-performance businesses and creating long-term relationships by being responsive and relevant and by consistently delivering value, new levels of performance, competitiveness and experiences for our customers and their stakeholders.

Now one of the leading technology companies in Eastern Europe, we started out in 2000 as a family-owned-and-managed business. Foresight and an ongoing desire to evolve attracted partners and talent of equally bold vision, insuring our 4 years in a row place in the 'Deloitte Technology CEE Fast 50' and 'EMEA Fast 500'.

InCrys owes the better part of its achievements to our active focus on people. We constantly invest in our employees' training, professional development, and general work-related wellbeing. Our people-oriented approach secures our place as trusted partner and ensures our clients can always find the appropriate resources to empower their business.

Requirements

- Java Development experience
- Java J2SE experience above 3years experience
- Java Springboot, Node, cloud native, etc - with a slant towards data ingestion/manipulation
- Very good understanding of Object Oriented and Enterprise Design Patterns
- Strong Java EE knowledge (Servlet, JSP + Tiles, JSTL, Filter)
- Front-End Web application frameworks: Apache Struts, JSF, EJB 3.0,
- Spring(Core/MVC/Security), Google Web Toolkit
- Web Services: RESTFull, Soap
- ORM: EJB 3.0, Hibernate/JPA, iBatis
- Unit testing using JUnit and EasyMock

Database knowledge:

- SQL/PL-SQL solid experience
- Oracle / DB2 database
- Pure web experience including Javascript, Ajax, HTML5, CSS3
- Tools: Ant, Maven, Continous Integration, SVN
- Application server knowledge JBOSS / WebSphere Application Server

Additional Information:

- Agile (SCRUM) experience is a plus
- Javascript frameworks: JQuery, DOJO, Angular.js
- French is preferred
- Technical team leading responsibilities are needed: status monitoring and reporting, team coaching and mentoring, etc

Responsibilities

- A curious and fast learner.
- Able to translate business needs to technical requirements and implementation
- Team player interested to be part of a senior team of talented developers
- Opened to learn new software development processes, like test-driven developing or domain-driven design
- Motivated by challenges and new opportunities (including learning technologies and products from the IBM WebSphere portfolio MQ, WMQ Broker, BPM, ESB, WODM, iLog)
- Performed analysis activities including requirement clarifications, documenting use case
- Actively involved in the functional and technical discussion with the client
- Performed estimations based on industry widely known of project specific methods and tools
- Create and implement technical software solutions and perform product integration (including unit testing, integration, and system tests)

- Actively involved in all the project stages (analysis, design, implementation, test/acceptance) when required
- Perform code review and provide technical mentoring for the junior developers

Other info

Benefits:

- Motivating salary
- Stimulating working environment
- Medical insurance
- Annual team building
- Opportunities to learn and grow your skills
- WorldClassmembership discount
- Udemu

Vodafone Romania

Scurta descriere a companiei

We want to inspire people to capture the opportunities of a digital future and build a better tomorrow. That is why we are here.

Over 30 years ago, we made the first ever mobile phone call and sent the first SMS in Britain and have been changing the lives of billions of people ever since. We are taking 4G to the Moon and using big data for social good to intelligent transport systems and emergency drones, we are still shaking things up.

Be part of a company which helps those who need it most. Whether teaching girls to code, providing connectivity to disaster hit areas or putting on our trainers and running for charity.

We believe being different is good. We're proud to offer equal opportunities regardless of race, nationality, cultural background, gender, age, marital status, sexual orientation, gender identity, disability, religious or political belief.^[1] We can only leverage this diversity by building an inclusive culture where everyone is respected, can be themselves and strive to be their best. Your different perspectives help us to shape the future.

The future is exciting. Ready?

Cerinte

Ti-ar placea sa lucrezi undeva unde birocratia, programul sau mediul de lucru nu iti dau batai de cap? Pare ceva greu de gasit, dar la noi ai multe sanse sa fii multumit.

Si tu poti fi colegul nostru daca:

Ai deja cunostinte sau vrei sa afli mai multe despre web, DNS, DHCP, servere de mail si medii de comunicatii (cablu, fibra optica, wireless);

Inveti repede cum sa folosesti aplicatiile noi si utilizezi la nivel mediu programele Microsoft Office;

Iti place sa gasesti solutii si sa ii ajuti pe ceilalti;

Iti doresti un program flexibil.

Responsabilitati

Ce fac colegii din echipa de Suport Tehnic?

Preiau apelurile clientilor Vodafone Romania si ii ajuta, solutionand cat mai rapid eventualele nefunctionalitati; Consiliaza telefonic clientii in ceea ce priveste configurarea echipamentelor, astfel incat sa asigure functionarea serviciilor de telecomunicatii la parametri inalti;

Propune clientilor pachete de servicii noi, in situatia in care identifica in cadrul discutiei telefonice oportunitatea de vanzare.

Toti colegii noi trec printr-un program de pregatire in ceea ce priveste interactiunea cu clientii, notiunile tehnice si aplicatiile dezvoltate pentru diagnosticarea sesizarilor de tip VoIP, DTV, Broadband.

Alte informatii

Oportunitatea unei cariere in Vodafone, nu doar Beneficii:

Programul este flexibil, poti sa gasesti usor timp sa pleci la mare sau la munte in weekend; in plus, o sa ai destula energie sa iesi la un suc dupa munca pentru ca poti alege cat timp vrei sa lucrezi (4/6 sau 8h);

Training platit in care vei avea ocazia sa inveti mare parte din tainele comunicarii, dar si multe aplicatii si servicii de telecomunicatii;

Esti innebunit dupa Games of Thrones? Iata ca poti citi cartile prin Bookster;

Stim ca te intereseaza si salariul, asa ca nu iti face griji, pe langa salariul de baza, avem si bonusuri lunare in functie de performanta, dar si bonuri de masa.
