PHP Developer Iasi

Nexus United

If **you would like** to:

- Be part of a team who values your experience, ideas, and know-how
- Work in a relaxed and friendly environment, with flat hierarchies which supports and encourages further education through mentoring and code reviews
- Grow in a company who values honesty and open communication
- Enjoy flexible hours and a casual work environment
- To celebrate together your success and be by your side when you need us

Then **join us** and let's **do more together**! We promise to be by your side when you need our support and to celebrate together your success!

We are currently working on modern, complex and attractive projects, and these are the skills **we're looking for**:

- Solid knowledge of PHP 5 & 7 and MySQL
- Proficient in using Symfony
- Experience with Laravel or Zend Framework is considered an advantage
- Hands-on experience with APIs (REST and SOAP)
- Basic skills in front-end technologies: HTML, CSS, JavaScript, native or using toolkits
- Working with composer dependency manager
- Code versioning skills with Git

It would also **be nice** if you would have:

- Development experience in an e-commerce environment
- Continuous integration and delivery know-how with Jenkins

- Familiarity with Elasticsearch and Solr search engines
- Experience with RabbitMQ message broker
- Basic knowledge of LINUX commands
- Virtualization experience with Docker or Vagrant
- Previous usage of Atlassian suite (Bitbucket, Jira, and Confluence)
- Agile development methodology

And here is what we will **do together**:

- Define, design, implement and deliver high quality features that meet the project's needs
- Write original code, modify existing code, debug possible problems
- Contribute in all phases of the development lifecycle
- Provide post-implementation support and monitor application performance
- Participate in sprint planning and other project management meetings
- Have the chance to keep up with advancements and changes in technology

Below you can find more reasons to **join us**:

- An attractive and rewarding salary based on your skills and experience
- Meal vouchers at the maximum value
- Medical insurance at Medlife
- 25 vacation days and extra days off based on seniority
- Flexible working hours
- Work from home (2 day/month)
- Flexible working hours
- Technical trainings on-site and in Germany
- A friendly working environment in the heart of the city
- Stand-up working desks
- Paid parking at Palas
- Sports club subscription
- Fresh fruits, snack bar, sparkling drinks, coffee and tea at your disposal

Thank you for considering our offer, we're looking forward to **meeting you!**

Te-a pasionat dintotdeauna **domeniul IT** și știi să faci diferența dintre un sistem gazdă și unul în rețea? Dacă limba **spaniolă** este punctul tău forte și le poți răspunde clienților cu zâmbetul pe buze atunci când au întrebări și ne scriu, aplică pentru poziția de **Suport tehnic**!

P.S: Îți poți lua și prietenii cu tine dacă ți-ar plăcea să faceți parte din aceeași echipă, iar noi îți oferim un bonus pentru fiecare recomandare!

Ce ne dorim de la tine?
- Să cunoști la nivel avansat Limba Spaniolă (atât scris, cât și vorbit);
- Să îți dorești să pui bazele unei cariere în domeniul IT;
- Să deții cunoștințe avansate de operare PC;
- Să asimilezi ușor informații;
- Să deții echipament tehnic.

Descrierea jobului

Care va fi rolul tău?

- Vei gestiona apeluri și e-mail-uri din partea clienților;
- Vei rezolva cu promptitudine diversele situații pe care aceștia le raportează;
- Vei oferi suport tehnic (level 1) și comercial, clienților noștri;
- Vei păstra evidența interacțiunilor cu clienții și vei înregistra informațiile transmise de aceștia;
- Vei participa la sesiuni periodice de training care să te ajute să te dezvolți pe plan profesional și personal.

Ce îți oferim?

- Vei avea un program de lucru flexibil, 8h/zi (Luni-Vineri);
- Vei avea un salariu fix, tichete de masă și bonusuri lunare de performanță;
- Vei avea parte de posibilități reale de promovare în cadrul companiei;
- Vei avea oportunitatea de a acumula experiență în domeniul IT – Software.

Descrierea companiei

Activam de aproape 15 ani in domeniul serviciilor de Business Process Outsourcing, avand 3 sedii in Bucuresti, Ramnicu Valcea si Bacau.

Gestionam proiecte in 7 limbi de circulatie internationala pentru companii de top ce activeaza in diferite industrii (pharma, retail, telecomunicatii, banking, IT, auto, etc.).

Principalul motor al activitatii noastre il reprezinta oamenii - motiv pentru care am investit si vom investi intotdeauna in angajatii nostri prin training-uri, stagii de pregatire si suport continuu din partea team leaderilor si a managementului.

Aici vei gasi o echipa prietenoasa si cu dorinta constanta de progres. Mai mult decat atat, apreciem oamenii valorosi, drept urmare, cei care demonstreaza initiativa si determinare au sanse reale de a fi promovati, majoritatea managerilor nostri pornind de la postul de reprezentant relatii clienti.

About WOODS VALLDATA

Woods Valldata has a wealth of experience supporting fundraising in the charity and not-for-profit sectors. Our industry-leading outbound and inbound fundraising services merge insight with innovation to generate real results.

We work with the charities to grow their individual giving programmes, creating bespoke strategies designed to help them achieve their objectives. Our end-to-end print and production, response handling and fulfilment services take the hassle out of operations, leaving our clients confident that their supporters are in the best of hands.

We're passionate about helping our clients raise more to help their beneficiaries. We do this by:

- Establishing, growing, or developing prize-led fundraising streams through raffle and weekly lottery programmes.
- Facilitating fast responses to donors through response handling and fulfilment services.
- Digital scanning to enable the secure and efficient management of records
- Acting as your compliant direct debit bureau, processing regular giving payments.

We believe in what we do and make it our mission to be the best.

If you'd like to find out more about our work, take a look through our client stories to see how we've collaborated with charities to develop and grow their fundraising programmes. We're proud to have supported some of the nation's best-known charities and most worthwhile of causes.

Woods Valldata takes client's reputation and their data seriously. We follow the highest compliance standards for PCI, ISO, and the Gambling Commission.

Candidatul ideal

eApps Hosting is looking for a **strong and effective** Technical Support Representative / System Administrator to join our Technical Support team.

The ideal candidate will have the **ability to resolve technical issues** with server side web sites and applications. The primary responsibility of this position is to provide technical solutions to eApps Hosting's customers. **This IS NOT a typical Tier I technical support position!** You will be expected to apply System Administrator technical skills, and strong analytical skills, to provide solutions to our customer's problems. This is a challenging position that requires a high level of commitment and flexibility in work hours. You must also have excellent English language skills.

With eApps, you will have a fast paced environment with constant challenges. Our team members have ample opportunities to learn, and grow. We offer a competitive compensation package and advancement opportunities.

This is a full time job. Our work model is remote home office. You must have a fast, reliable Internet connection and a quiet place to work. From time to time you may be required to travel for company meetings. We run a 24/7 operation. This position will require odd work hours such as evenings and weekends. Candidates that can cover the US Eastern Time zone will be strongly considered for this position.

If you are interested in working in a fast paced environment, with a great team that supports each other, please apply now! Make sure to submit your CV with your application.

Descrierea jobului

You will be responsible for solving technical problems with the customer's hosting services. In order to succed you must have. The successful candidate will have a reqarding and challenging position, with the opportunity to grow and advance. All of our senior technical staff started as a Tech Support representative.

TECHNICAL SKILLS SET:

REQUIRED SKILLS

Linux Operating Systems (CentOS, Ubuntu and/or Debian) Knowledge - Exceptional knowledge of Linux is a must. You must be able to install a Linux server from scratch and configure it on a network. Experience with clustering software and techniques is valued (Pacemaker, Corosync, DRBD, Percona XtraDB Cluster, etc.)

Windows Server Operating Systems (2012 - 2020) Knowledge - Windows Knowledge is required. You must be able to install a Windows server from scratch and configure it on a network.
Solid Networking Foundation - You must have a good understanding of how a public facing network operates. You must understand basic network administration to succeed in this position.

Good Understanding of Internet Protocols - Candidate will understand common protocols such as HTTP, HTTPS, SMTP, IMAP/POP3, and DNS.

Database and Applications Experience - Experience supporting web applications and complex websites is highly valued: Java, PHP, MySQL/MariaDB, MSSQL and PostgreSQL.

DESIRABLE and VALUABLE SKILLS

Virtualization Technology - experience working with virtualization technologies such as KVM, Virtuozzo and VMware. Experience with Cloud technologies is a plus.

Development Experience - experience in debugging / development in JAVA, PHP and any other language.

DevOps Experience - We work with Ansible mostly, but any kind of experience in this field is welcome.

Shell Scripting - experience is a plus.

PaaS - Experience with Platform as a Service or any other auto-scaling platform is a plus

Server Security - Experience with iptables rules management and the basics of encryption is a

plus.

PERSONAL SKILLS SET

Language Skills - Candidate must be proficient in English, both written and spoken, in a technical environment.

Good Judgment - Successful candidate will be able to judge situations and make decisions quickly.

Great Problem Solving Skills - Your primary responsibility will be to get to the bottom of problems and solve them.

Descrierea companiei

eApps Hosting is a high value provider of managed hosting and related services for businesses and organizations throughout the world. We have been recognized as a pioneer for our use of advanced virtualization technology to power mission critical websites and applications. We are seeking high energy people that are willing to meet the challenge of building a world class hosting company.

- Has data processing or tabulation experience in a market research environment. We primarily work in Askia but experience of any package (e.g. ConfirmIT, SPSS, SAS, Quantum, Nebu, Merlin etc.) is acceptable as training will be given
- Has strong logical, numerical and problem solving skills and a good attention to details
- Is well organized and able to juggle tasks and priorities in a time-pressured environment
- Wants to progress in the growing world of research communities
- Is a good team player who is willing and happy to undertake a variety of tasks in a project's life-cycle
- Has strong English language skills both oral and written
- Experience of working with Access or SQL databases including query writing will be a plus

Descrierea jobului

What does the job involve?

- Set-up of data tables for reporting findings from surveys
- Checking tables to ensure high quality

- QA data deliverables that are sent to the client
- Database management of our customer communities, including database cleaning and reporting
- Assist in the setting up, reporting and management of surveys

Working hours: 11:30 - 20:00

Descrierea companiei

VERVE - the specialist in Community Panels for research

At Verve, you will be part of a truly multi-national and multi-cultural environment, surrounded by forward-thinking people who do meaningful work by helping brands improve the products that they offer us. We work with companies such as Samsung, Vodafone, Virgin Active, Walgreens, Gartner, Boots and many more.

You will have the opportunity to join a friendly team, located in the heart of the city. Moreover, we love to organise monthly company drinks in different locations along with other social activities. In addition to the day to day support from our team, we have designed the **Verve Academy** concept – this is a structured programme consisting of frequent trainings, which helps employees at all levels and all departments learn new skills and improve existing ones.

We are a market leading, built for purpose team with our disciplines including research, co-creation, creative design, marketing, technology and international panels.

We combine these skills to create vibrant and engaged community panels, which deliver quality, timely and creative research for our clients.

- Interface with connected disciplines such as SW engineers, QA engineers throughout the entire software development cycle
- Document all development steps according to the process
- Analyze and understand project / customer requirements

Descrierea companiei

For more than 20 years, we've assisted clients in major industrial projects in Romania. Our 1500 employees, based in Bucharest and Iasi, work either directly with clients or as a nearshore resource for global clients partnering with our Western European offices. Our spacious design offices attract skilled personnel in mechanical, electrical, electronics and software development.

Our teams are best known for helping clients in the automotive and aeronautics sectors to reimagine road and air travel. Expleo in Romania is a key support for the group to help automotive clients in developing the next big breakthroughs in ADAS, autonomous vehicles and connected cars. In aeronautics, we provide support for major OEMs and their suppliers across the entire aircraft, from R&D to aftermarket support. Our people have access to sophisticated IT infrastructure and the latest digital technologies, that allows them to work alongside project teams based in Romania or anywhere else in the world.

- Cunostințe de limba engleză, italiană
- Oraş de lucru

Candidatul ideal

Basic qualifications:

- Advanced communication skills in English and an upper-intermediate level for Italian;

- Bachelor's degree in any discipline is preferred;

- Minimum 1-2 years of work experience.

Job Requirements:

- Good working knowledge of MS Office; Excel skills to be able to refine data and prepare

business reports;

- Strong communication skills to interact with vendors and internal customers;

- Critical and analytical thinking in order to challenge processes and status quo ;

- Ability to work with large amounts of data;

- Maintain composure in critical situations;

- Ability to work with global and cross functional teams;

- Resistance to repetitive tasks and ability to identify automation opportunities;

- The ability to learn and to work on more tasks at the same time;

- The ability to anticipate customer's needs and to set correctly the right expectations

Preferred qualifications:

- 1 – 2 years of experience in data-driven business operations processes

– BPOs, Operations processes; Database management, Data analytics is preferred.

- VBA/SQL knowledge.

Job description :

Amazon opened its virtual doors in 1995 and strives to be the world's most customer-centric company, where customers can find and discover anything they might want to buy online. The Retail Business Service (RBS) group is an integral part of the Amazon online product life cycle. The team is designed to ensure Amazon remains competitive in the online retail space with wide selection, good product information and the best price. The tasks handled by this group impact customer´s buying decisions and online user experience.

Depending on the team you will be part of, you will have the opportunity to support and contribute to one of the key processes within RBS, which will impact customers' experience, such us:

- Offering support to the Italian vendors/manufacturer by validating the information received from them and uploading the content on Amazon´s catalog, creating new product detail pages or improving the already existing ones (product description/content/etc);

- Ensuring that the website content is accurate and up to date by analyzing website customer reviews, assigning products to the correct categories so that customers can easily find the products they need, performing quality audits to be sure everything that appears on the Amazon websites respects company's standards.

- Resolving defects both at the warehouse and at the customer side by analyzing the available data and using internal tools, proposing corrective actions to prevent future similar problems that might appear at the customer or the supply chain level.

In your day-to-day job, depending on the process you will be working on, you will be faced with numerous challenges such as:

- Demonstrate expertise in handling end-to-end processes and related tools in order to achieve business goals;

- Perform root cause analysis, researching for missing information, finding the main errors and solving them in order to ensure the correct functioning of processes and to enhance team performance in terms of productivity and quality;

- Supporting and implementing improvement ideas in order to improve processes efficiency;

- Monitor team and individual KPIs (productivity, quality, utilization, etc), create reports and raise the flag and dive deep on deviations;

- Share knowledge and best practices with the team by email, shadowing sessions, workshops. Training and mentoring other Associates to ensure a fast ramp;

- Taking part in client calls, leading and documenting the discussion.

- Advanced communication skills in English and an upper-intermediate level for Italian;

- Bachelor's degree in any discipline is preferred;

- Minimum 1-2 years of work experience.

Job Requirements:

- Good working knowledge of MS Office; Excel skills to be able to refine data and prepare business reports;

- Strong communication skills to interact with vendors and internal customers;

- Critical and analytical thinking in order to challenge processes and status quo ;

- Ability to work with large amounts of data;

- Maintain composure in critical situations;

- Ability to work with global and cross functional teams;

- Resistance to repetitive tasks and ability to identify automation opportunities;

- The ability to learn and to work on more tasks at the same time;

- The ability to anticipate customer's needs and to set correctly the right expectations

- 1 – 2 years of experience in data-driven business operations processes

– BPOs, Operations processes; Database management, Data analytics is preferred.

- VBA/SQL knowledge.

Descrierea companiei

Amazon opened its virtual doors in 1995 and strives to be the world's most customer-centric company, where customers can find and discover anything they might want to buy online. Since its launch in July 2011, RBS Romania became the main catalog service provider for the Amazon.it and Amazon.es portals, currently managing operations for all EU websites, as well as

Mexico and Brazil. Our main activities focus on creating Amazon product pages, ensuring the content is accurate and up to date and resolving any issue that might appear on the supply chain. Today, our team consists in over 200 catalog specialists and continues to grow in order to cover for the ever-expanding Amazon business worldwide.

- Professional development opportunities;
- Competitive salary and bonuses;
- Meal vouchers.

Descrierea companiei

Since 1919 Preh has stood for technical innovation and SME-style flexibility. Having started out as specialists for radio and subsequently TV electronics, the company has evolved over decades into a global supplier and much sought OEM Partner in the automotive sector.

So when you have 100 years of history and you're one of the top automotive suppliers, you have to be able to reinvent yourself time and again. And most importantly, be flexible, creative and committed. This enables our automotive customers to extend their lead and make the future of motoring a reality.

Our staff translate our values into boundless customer commitment. Why? Because Preh combines a very personal, family-like corporate culture with the dynamics and creativity of a modern automotive supplier.

We're proud to work for makes such as Audi, BMW, Daimler and Porsche – because you can find Preh products as soon as you get into a car. It's wonderful to be able to say to your family and friends: "That's one of our parts, a Preh part!".

Candidatul ideal

We're looking for a **Backend Developer** to join our team in rolling out a brand new SaaS product that will support companies managing digital transformation. This role will require the focus and commitment of a person that is energized by building a scalable, data-driven solution. Your

passion for cutting edge technology will be equal to a proven ability to deliver.

To be successful in this function, we have the following profile in mind:

- You're a tech person: you have a love for coding, which was only further encouraged during your studies (IT degree or self-education) and reconfirmed in work experience;
- You are able to write solid code using Typescript and Node.js and have an interest or experience with LoopBack or Express. Additional skills like Python and/or PHP (Laravel) knowledge put you in a front seat!
- You have an active interest in cloud-based solutions and modern DevOps techniques as this is our way forward;
- You're pragmatic: you are target orientated and can work independently;
- You have previously worked in an environment where best practices like CI/CD, unit testing and automated QA testing were in use;
- You love working with a roadmap and releases because they're proof of how well you're doing. You do everything within your power to get the job done;
- You are a communicator: you value two-way communication and want to understand underlying business needs. Good English communication skills are a necessity.

Descrierea jobului

As **Backend Developer** you will:

- work on our backend codebase which will be implemented as a number of smaller (micro)services using NodeJS and serverless components;
- be able to use your experience taking ownership of considerable parts of the stack having the responsibility to write code, write automated tests, and deploy to testing and production environments. As if this would not offer you enough variation, you might be involved in some technical analysis as well;
- experience and contribute to the drive of a startup team and the professional agile work organization of an established company, using the Kanban approach and tools;
- last but not least, enjoy closely working with our CTO and the rest of the team that we are putting together.

What we offer

- An awesome, dynamic team is waiting for you! You will never get bored! We move fast like a "start-up" but have the professionalism of a billion euro company. We are part of the biggest startup ecosystem in Belgium. This means a great start-up atmosphere and an exciting fast-growing environment with lots of perspectives and opportunities to grow personally and professionally;

- The opportunity to carve your own signature into our growth story;

- A company culture that likes to work and play hard. We like to have fun. There is no sense coming to a job every day if you don't like the people you work with;

- The experience you bring and your motivation are crucial to us.

Benefits

Growth and personal development are key to any position within ISSCO. The benefits we offer sustain our mission and allow you to add value to your job and personal life. Some of our benefits include:

- Real potential to grow through the availability of needed resources;

- Honest and clear evaluation processes;

- Meal tickets;

- 24 vacation days per year;

- Competence lead program;

- Coaching and mentoring program;

- Personal development program;

- Access to conferences;

- Company events and team events;

- Extra benefits catalog, choose the benefits you care for.

Descrierea companiei

ISSCO, software development with a twist: a passion for people & community growth

We develop software solutions as key instruments for our customers to innovate and grow their business, through engagement, persistence, expertise and passion for technology and people.

At ISSCO, we believe in creating a positive work environment and make sure we find ways to accommodate key aspects of a balanced life for our teammates (career, finance, social, community, personal development, health & fun).

Candidatul ideal

You are the ideal candidate for this job if you have:

• Bachelor's or Master's Degree in Finance/Economics from a reputable university

• Prior research experience, regardless of domain

• Excellent attention to details

• Strong organizational skills and work ethic

• Advanced Excel skills are a big plus

• Very good English

Descrierea jobului

Responsibilities include:

• Research in personal finance as well as adjacent domains and topics from a personal finance perspective (health, education etc)

• Participate in creating the methodology used for the research studies

• Gather, sort and then analyze and interpret data

• Prepare studies for launch and coordinate with the rest of the team to make sure everything goes smoothly

Our offer:

• Very competitive salary based on skills and prior experience ($800 - $1,500/mo)

• Raise and advancement opportunities based on periodic evaluations

• Paid overtime

• Free training provided

• 100% remote position

Notes:

• Expected work schedule is 50 hours/week, Monday to Friday.

• This position entails a full overlap with US EST business hours.

• All selected candidates will have to pass a series of tests that focus on their English skills, Excel skills and attention to detail.

• Although we appreciate your interest in working with us, due to the high number of applications we receive, we will only be able to respond to successful applicants.

Descrierea companiei

About us:

WalletHub, the #1 Personal Finance App in the US and one of Forbes' Top 100 Best StartUp Employers in 2020, is rapidly growing its Romanian operation (currently over 50 members working remotely). Even though we are based in Washington, D.C. most of our team members work remotely from every corner of the world and as such we provide a highly multicultural work environment.

More details about Wallethub:

We are harnessing the power of data analytics and artificial intelligence to build the brain of a smart financial advisor, whose services we're offering to everyone for free. The WalletHub brain enables users to make better financial decisions in a fraction of the time with three unique features:

1) **Customized Credit-Improvement Tips:** WalletHub identifies improvement opportunities and guides you through the necessary corrections.

2) **Personalized Money-Saving Advice:** WalletHub's savings brain constantly scours the market for load-lightening opportunities, bringing you only the best deals.

3) **Wallet Surveillance:** Personal finance isn't as scary with 24/7 credit monitoring providing backup, notifying you of important credit-report changes.

In addition to the valuable intelligence the brain provides, WalletHub is the first and only service to offer free credit scores and full credit reports that are updated on a daily basis absent of user interaction, rather than weekly or monthly and only when a user logs in. Some other services hang their hats on free credit scores and reports, yet they're still inferior to what WalletHub considers minor pieces to a much larger puzzle.
