Limbi vorbite engleză

Adresa Cluj-Napoca ; Braşov ; Iasi ; Sibiu ; Oradea ; ...mai multe

Recrutez candidati dispusi sa se relocheze Da

Salariu brut pe luna 3000 - 5000 €

Posturi disponibile 5

With around 1,200 employees and currently 500 free consultants, we support renowned companies in implementing IT projects.

For one of our clients in München, Germany, we are looking for a PHP Developer (m/f/d) all levels.

### Task description:

- Performance optimization for our reference routes
- Development of new features
- Further development and maintenance of the overall architecture, consisting of frontend, backend, databases, caches etc. (comparison mask, comparison result, final section, REST API)
- Optimization and scaling of the system in service-oriented architecture
- Expansion of our automated release process (Continuous Integration) and quality assurance (Unit Testing)

### Requirements:

- At least 2 years professional experience as a developer (m/f/d)
- Profound knowledge of PHP and MySQL
- Basic knowledge of HTML, CSS and JavaScript

- Quality awareness; you work for us independently and solution-oriented
- You enjoy working in a team and are communicative
- Interest in e-commerce and a pragmatic approach

**And this is why you'll love this job:**

- Security of an established online company with start-up flair - we hire permanent staff for an unlimited period of time
- Steep career opportunities (specialist or management career) through continuous growth
- Vouchers for numerous products of the company and a subsidized company pension scheme
- Extras such as drinks and fruit are a matter of course for us!
- We celebrate successes together at numerous events

Duration: Permanent contract

Location: München

Start: asap

**It takes the brightest minds to be a technology leader. It takes imagination to create green energy for the generations to come. At Siemens Gamesa we make real what matters, join our global team.**

Siemens Gamesa has a vision for renewable energy: we believe in the power of nature and technology. Help us to be ready to face the energy challenges of tomorrow and make a green footprint – join the team in creating a better future for us on our planet.

We focus on hiring the best people, wherever they may be in the world. We pride ourselves on the flexibility we offer to our employees and are committed to building a workforce that can grow with the company. Siemens Gamesa is an equal opportunity employer. We celebrate diversity and are committed to creating an inclusive environment for all employees.

In our culture of trust, we focus on empowerment, diversity and continuous learning. Valuing our people is what makes us one global team, with our colleagues' safety at the heart of our organization.

For our CAD team in Brande, we are looking for ambitious and enthusiastic design engineers to develop future transport, lifting and installation equipment for the next generations of offshore wind turbines.

You will join our New Product Engineering team in Offshore Equipment Engineering, which is responsible for designing all generic lifting, transport and installation equipment for our new Offshore turbines.

### **How to contribute to our vision**

You will contribute with 3D concept development, detailed design and design specifications. You will participate in FAT and SAT tests of equipment at suppliers and at preassembly sites. During the design you will be using design tools ex. Siemens PLM NX and Teamcenter, FMEA, Design Risk Assessment, Geometrical Product Specifications, Tolerance Stack up Analysis etc.

In the CAD role you will be working closely together with our calculation engineers (FE) and our Project managers. As part of our team, you will also be closely cooperating with the turbine development department, making sure all new turbine components can be transported, lifted and installed on time and on cost. We are also closely linked to the Sales & Execution organization which is responsible for all customer-, country- and harbor specific equipment.

The team is based in Brande/Denmark with cooperation partners and co-workers mainly based in Denmark and India.

### **What you need to make a difference**

Passion for renewable energy and a sense for the importance to lead the change.

The ideal candidate has CAD experience within structural components and experience within hydraulic systems - either practically and/or theoretically.

It is key that you are agile, innovative and a problem solver so you are able to drive forward the projects you are part of.

### **In return of your commitment we offer you...**

Become a part of our mission for sustainability: Clean energy for generations to come. We are a global team of diverse colleagues who share a passion for renewable energy and have a culture of trust and empowerment to make our own ideas a reality. We focus on personal and professional development to grow internally within our organization. Siemens Gamesa offers a wide variety of benefits such as flexible working hours as well as home-office possibility for many colleagues, employer-funded pension, attractive remuneration package (fixed/variable) and local benefits such as subsidized lunch, employee discounts and much more

## Despre noi

Atlas Sport cea mai mare firmă specializată în construcții sportive din România cu santiere in toate judetele din tara cauta **sef de santier/inginer constructor** cu experienta.

Tinta noastră este să ramanem în continuare alegerea nr 1. Pasionați de proiectare și construcție baze sportive și locuri de joacă, furnizăm cu mare success soluții complete și accesibile pentru dezvoltarea infrastructurii sportive din România. Realizăm baze sportive si parcuri pentru sute de clienti in Romania si Europa de la corporații multinaționale (LIDL, PIRELLI, GEDEON RICHTER ș.a.) la primării importante (Satu Mare, Giurgiu, Bistrița, ș.a.), ministere, cluburi și licee sportive (LPS Roman, ș.a.), universități (UMF, USAMV Cluj, Univ. Pitești, Iași, ș.a.), antreprenori și investitori privați – toți aceștia ne-au ales pentru a realiza cele mai bune terenuri de sport si locuri de joaca.

Serviciile oferite includ tot ce ține de realizarea unui proiect de la A la Z, de la proiectare, până la predarea la cheie a unui proiect. Dintre lucrările realizate în trecut, enumerăm: terenuri de sport pentru practicarea a diverse activități sportive (fotbal, handbal, tenis, baschet, volei, etc.), de dimensiuni variate, cu diferite suprafețe de joc (gazon natural, gazon sintetic, tartan, zgura, etc.), acoperite sau descoperite, cu împrejurimi, nocturne, dotări, și alte lucrări aferente, precum și spații de agrement.

- Pasiunea noastră este de a încuraja practicarea unei vieți sănătoase prin sport, construind cele mai bune baze sportive.
- Misiunea noastră este de a fi SOLUȚIA pentru orice client care are nevoie de un proiect de infrastructură sportivă în România.
- Scopul nostru este de a vedea clienții satisfăcuți și comunitățile locale cum se bucură de rezultatul muncii noastre.

## Cerinte:

- abilitati de organizare si planificare a lucrarilor din santier
- cunostinte si experienta in domeniul constructiilor
- abilitati de comunicare cu beneficiarii lucrarilor
- absolvent studii superioare constructii constituie avantaj
- 

## Responsabilitati:

- Planifică și organizează execuția lucrărilor, verifică realizarea lucrărilor cu respectarea ordinii de execuție stabilită, stadiul lucrărilor și încadrarea în termenele de execuție;
- Planifică, urmărește și coordonează activitatea din șantier a subcontractarilor
- Coordoneaza si supravegheaza activitatile din cadrul santierului privind controlul calitatii si pregătirea/instruirea echipelor din subordine in conformitate cu standardele in vigoare si obiectivele companiei;
- Studiază detaliile de proiectare și documentația tehnică necesară pentru lucrările de construcție
- Răspunde de respectarea riguroasă a tehnologiilor si a sigurantei in execuție;

- Menține legătura cu persoanele din cadrul firmei implicate in procesul de constructie;
- Intocmeste documentatia de calitate aferenta lucrarilor executate (Cartea Tehnica a constructiei);
- Intocmeste necesarul de materiale, resurse financiare, resurse umane si urmareste incadrarea costurilor in bugetul alocat;
- Intocmeste rapoarte de lucru și verifica/realizează situații de lucrări

#### Se ofera:

- salariu motivant
- bonusuri de performanta
- masina de serviciu
- diurna
- cazare

*Miele Tehnica is a subsidiary of Miele & Cie. KG, Germany. We produce electronic components for a wide range of Miele appliances, such as washing machines, tumble dryers, vacuum cleaners, ovens and others. The products Miele offers to its customers set the standards for durability, performance, ease of use, energy efficiency, design and service products.*

To extend our offering we are currently establishing a software development division in Brașov. As a **Professional Embedded Developer** you will have the opportunity to work on top-of-the-range next generation products, in an international environment, taking into account customer requirements, coming up with flexible designs, yet keeping your implementation robust and stable. Meet the challenge of delivering in time, to budget and specification. Work together with colleagues in a team locally as well as across borders. Last, but not least, rest assured that the fruits of your labour will power hundreds of thousands of appliances worldwide.

## Your responsibilities will include:

- Design and development of software components, from low-level drivers up to GUI, to be integrated into our custom embedded platform for various types of appliances;
- Model efficient data structures and algorithms;
- Ensure that deliverables meet quality goals, time and cost constraints;
- Assume responsibility for the long term quality of deliverables by ensuring that the test concept and implementation meet the expected standards
- Maintain a close working relationship with software engineers and architects at Miele Electronic in Germany.

**The ideal candidate has:**

- Master degree in Computer Science, Electronic/Electrical Engineering or a related field;
- Strong proficiency in advanced C/C++, as well as in scripting languages like Perl and Python;
- 4+ years professional experience of development related tools & practices (configuration management, debugging and refactoring of legacy code, software lifecycle, V-model, agile methods, review techniques, continuous integration and delivery, etc.);
- Good knowledge of system design and requirements analysis methodologies;
- Familiarity with model based systems engineering, SysML or similar
- Practical experience with safety concerned software designs and rules (. MISRA, Software Safety Classes);
- Profound knowledge of microcontroller technology and electronic components;
- Proven track record of delivering projects on time and to specification;
- Excellent spoken and written English;
- Knowledge of German language is an advantage;
- Positive attitude to be working in team in an international environment, with a self-starter attitude and eagerness to tackle unknowns;
- An interest in keeping up with current and upcoming developments and technologies in the field of software engineering;
- Willingness to go on business travel to the German HQ and relating plants.

**What we offer:**

- Competitive salary package, according to performance and professional experience;
- Modern facilities located in the Braşov proximity;
- Great career opportunity in an innovative and dynamic working environment.

We're looking for a Drupal Developer to join our team.

### What we are looking for:

- Experience developing web solutions in Drupal (7&8) and PHP implementations;
- Ability to architect enterprise Drupal solutions including data, display, and information architecture;
- Advanced site-building experience including deep familiarity with Drupal modules such as Ctools, Views, and Panels;

- Experience creating custom Drupal modules;
- Experience building responsive websites using Drupal CMS, HTML/HTML5, CSS/CSS3, and JavaScript/jQuery;
- Knowledge of PHP and knowledge of the Drupal theme layer;
- Thorough understanding of the Software Development Lifecycle (Requirements, Design, Development, Testing);
- Fluency in English.

**Some business facts about Tremend:**

- 14+ years of software development
- 700+ high complexity projects
- 60+ million people using our solutions
- Clients in 19 countries on 4 continents (North America, Europe, Asia, Australia)
- 20 internationally awarded projects
- Top EU telecom clients

**Some cool facts about Tremend:**

- 5 top global car manufacturers use our software;
- One of the startups we worked for was acquired by Google®;
- One of the founders climbed Mont Blanc (the other one does triathlons).

**Some friendly facts about Tremend:**

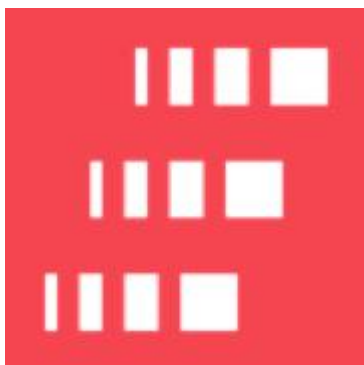

- Top salaries for top talent;
- Nothing short of legendary buildings;
- Fruit days;
- Bonus days off with seniority;
- Working from home days;
- Premium medical insurance;
- Performance bonuses;
- And again, legendary corporate parties.

**We really welcome people:**

- Ready to learn new things (we have some amazing mentors here);
- Able to teach us new things (we really appreciate and reward experience);
- Who don't want to be just another cogwheel in a huge code factory;
- Wanting their work and skills to be recognized and appreciated.

Want to know more? Send an email, even if you don't see an open position that fits your description. Simona, our HR manager, she is amazing and cool and recognizes good people in a glance (and she approved this text, thanks, Simona).

This position is available **Remote** or from our **office in Galati**.

We have multiple positions open for Front-end, Back-end, and Full-stack developers  
- **JavaScript** everywhere.

**Who we are:**

We are a software development services company focused on the US market and building internal products that we aim at bringing to market in 2020.

We are currently growing thus we're looking for versatile developers to join us.

**Who we are looking for:**

The candidate profile should have 4+ years of experience on the front-end, back-end, or full-stack using JavaScript-based technologies. Also, a good understanding of application architecture and design patterns would matter.

As a member you should be able to perform the following activities:

- ability to architect and implement entirely a given feature on the front-end, back-end, or full-stack depending on your specialty
- 4+ years of experience as a JavaScript developer with one of the following: front-End (React or Angular), back-end (Node, Express, NestJS) or full-stack (MERN/PERN)

**Adresa**

Iași; Suceava; Galati

As one of the leading automotive suppliers worldwide, we develop solutions to fulfill people's dreams of mobility on a daily basis. Driver safety, sustainability and industrialization of future technology are just some of our key fields where we already make a meaningful difference in the everyday life of people. Knowing our technology helps to make the world a better and safer place is what drives us.

### **Software Developer for Electrification Technology (HEV)**

As a member of our Electrification Technology software development team, you will be involved in building the future of those new innovative products, that not only make driving more affordable and environmentally sound, but also work towards our department vision: zero-emission mobility.

In ET Vitesco Iasi location, software developers are passionate about automotive and they will help to improve your knowledge on: microcontroller drivers, communication services (CAN/LIN/SPI), Voltage Stabilization System, safety management functions (SMF), high level interface (HLI), software for hardware test and base development software for current and cell supervision sensors.

You will work within an agile team being able to choose from the dynamic tasks in all above areas from a hybrid electrical vehicle, or to specialize in a certain field of activity

#### **Job description**

As a Software Developer in our group, you will:

- develop embedded software in interdisciplinary project teams at international level;
- follow company standards applicable in all SW development phases;
- regularly report the status of development to your direct manager;
- collaborate within our international development teams and synchronize with our internal customers.

A mentor will support you to stepwise take over your own responsibility after an initial training phase which will familiarize you with our products, tools, processes and organization.

#### **Job requirements:**

- University degree in a relevant field (. Computer Science, Computer Engineering, Electronics and Telecommunication etc)
- Knowledge of electronics and microcontrollers
- Knowledge of real time systems (operating systems, science, Electronics and Telecommunication...)
- Programming skills in ANSI C tasks)
- Matlab Simulink is a real advantage
- Good level of English

#### **What we offer:**

- Integration Program in a Professional, Young & Dynamic Team
- Competitive Salaries & Benefits

- Professional Development Opportunities
- Health & Wellness

Vitesco Technologies is a leading international developer and manufacturer of state-of-the-art powertrain technologies for sustainable mobility. With smart system solutions and components for electric, hybrid and internal combustion drivetrains, Vitesco Technologies makes mobility clean, efficient and affordable. The product range includes electrified drivetrain systems, electronic control units, sensors and actuators, and exhaust-gas aftertreatment solutions. In, Vitesco Technologies, a division of the Continental AG, recorded sales of EUR billion and employs more than employees at about 50 locations worldwide. Vitesco Technologies is headquartered in Regensburg, Germany.

## Senior Java Software Engineer on Google Cloud

Appsbroker

A raspuns la 90% din aplicari in ultimele 30 de zile, in maximum 72 de ore

Java developer Jenkins RESTful API Maven Servlets ... [mai multe](#)

### Nivelul carierei

Senior (5-10 ani)

### Tip angajare

Full time

### Limbi vorbite

engleză

### Adresa

Iasi ; Strada Palas, Iasi

### Company Overview

Appsbroker is Google's largest Premier Partner in Europe. We deliver leading-edge cloud professional and applications services to some of the world's most exciting brands, in sectors

from retail through automotive to finance. We are in a very exciting period of growth and we need exceptional professionals to help drive further expansion.

We provide a very supportive and engaging employee environment with an emphasis on fun and creativity across all of our activities. We are made up of like-minded people who collectively and consistently deliver great customer experiences. Being a people focussed business means we put the team and the customer at the heart of everything we do, whilst delivering exceptional solutions.

The projects and technologies we work with are changing the way business collaborates, communicates and makes decisions. This is a great opportunity to be part of the future model for business success. We offer a fast-paced and challenging environment offering you the opportunity to make a direct contribution to the success and rapid growth of the business.

## **Line Manager**

Development Manager

## **Role Summary**

You will be responsible for delivering high quality, robust solutions as part of a fast-paced agile environment. The successful Senior Java Software Engineer will be involved in all aspects of development, utilising industry standards and best practice at all stages.

We work using agile methods (scrum & kanban), so an excellent working knowledge of this is a must as is excellent communication skills as you will regularly interact with people from across the business.

Your previous experience will mean you are adept at finding solutions to complex problems taking ownership and providing a recommended approach to engineering management.

We're committed to continuous improvement, so you will be expected to proactively suggest and implement enhancements, additionally mentoring junior team members to grow their skills and experience and act as a role model.

You will get exposure to the latest Google technologies including Google Compute Engine, App Engine, Kubernetes, BigQuery. Training & certification in Google Cloud Platform technologies provided on the job and by Google.

## **Responsibilities**

- Ability to use a wide variety of open source technologies and tools
- Good scripting skills in a Linux-environment language, other coding skills are considered a plus (Python, Java, etc)
- Have active participation in agile planning, refinement, retrospectives
- Take ownership in developing and testing user stories
- Ensure standards and best practice are followed
- Foster a culture of continuous improvement within the team
- Work closely with the product owner and stakeholders to achieve acceptance of user stories
- Define and communicate complex design concepts to technical and non-technical people
- Be objective around solutions and looking to reduce technical debt
- Have a good understanding of all aspects of the project they are working on
- Consider the non-functional requirements of a project, and strive to make software robust

- Mentor junior team members to improve their skills and experience.

**This job is for you if you have the following**

- Senior Java Developer with 5+ years of relevant experience
- Deep Java development experience (JEE) and Java Servlets
- Design and development of RESTful services
- Experience of DI frameworks, such as Spring
- Experience with databases, both relational and non-relational
- The ability to create solution designs using UML, especially sequence, class and activity diagrams
- Demonstrable experience of accurate estimation and the ability to deliver on time and to quality
- Use of source code and continuous integration tools, . Git, Maven, Jenkins
- Proactive communication with others
- The ability to self-manage, self learn and seek out answers
- Excellent unit, integration and regression testing skills.
- Good documentation skills.

**And you're extra awesome if you've got these too:**

- Experience working within a Cloud environment
- Kubernetes, Docker
- Google Cloud Platform & Google APIs
- Google Guice
- Cucumber
- Linux experience

**What we offer to you:**

- Motivating salary
- Intensive and continuous training with Google certifications
- Opportunity to visit the UK office for training and project work
- A Googly working atmosphere in modern offices

**Location**

- Iasi, Romania

**Job Type**

- This a full time, permanent role

**Shift**

- Monday to Friday
- 09:00- 18:00/ 10:00-19:00

Interested in a **career upgrade**? We have the **right opportunity** for you!

## **What would be new for you**

**The company** / Beeneer has over 15 years of experience on the IT&C market. With headquarters in Iasi, Beeneer has been providing software development services to the global market.

**The partner** / Kantar is the world's leading data, insights, information and consulting company, with around 100 employees working in 100 countries. Kantar is the number one Microsoft partner for the Consumer Goods industry and the leading software provider for sales automation software.

**The solution** / A powerful, end-to-end solution which supports the trade promotion lifecycle, from planning through retail execution, sales intelligence, and distributor management for the global consumer goods industry. The solution enables the world's leading brands to stay ahead of market trends, build strategic business plans and maximize growth opportunities.

## **What you need to own**

- Customer-oriented attitude for implementing the project within the requirements
- BS/MS Computer Science or equivalent certified education
- Strong experience with C# programming language and OOP principles
- Hands-on experience with web technologies: HTML/HTML5/CSS, JavaScript
- Strong database concepts and SQL language
- Agile methodologies and practical proven knowledge
- Good analytical skills and solution-oriented thinking
- Effective communication and interpersonal skills
- Team player skills with a proactive attitude
- Fluency in English

## **What would be nice for you to know and have**

- Silverlight and/or WPF, Sencha Ext Js and/or Sencha Touch framework skills
- Software best practices and design patterns
- Know-how of Oracle Databases

## **What we can offer you**

### **Great team**

- An innovative and collaborative environment
- International exposure and challenges
- Team-building activities and social events
- Flexible schedule and 'work from home' possibility
- Annual holiday entitlement of 21 days, 1 extra day every 3 years

### **Outstanding growth**

- Beeneer Academy – soft & hard skills trainings and workshops
- Professional Certifications relevant for your role sponsored by the company
- Bookster and Plural Sight access

### **Excellent compensation**

- Annual salary review based on performance
- Meal tickets and gift tickets for Easter and Christmas
- Medical Insurance with Signal Iduna
- Discounted subscriptions for local gym providers
- Access to "7 Card" subscription

- Employee Referral Bonus Policy for you and your recommendation

### Why you should choose us

**Our mission** / We aim to be a point of reference for software development and trusted partners for the biggest solution providers on the market.

**Your role** / Being part of our motivated team and to focus on your professional growth, to allow us to provide you all the necessary support, so that together we can achieve great results.

**Our team as a family** / Studies show that we spend one third of our life at the office. This of course means that we need to have a nice working environment so we can have someplace nice to come back to. We started more than 15 years ago, and we were only 7 at the end of the first year. Now we are almost, but we are all together in this, we are all in the same boat, a one big, happy family that could also become yours.

**Our interesting projects** / We work with partners involved in many areas of activity, such as retail, logistics, engineering, manufacturing, law and advertising. This gives us the opportunity to gather a deeper knowledge on the world around us, and most important, the opportunity to gather also business know-how, not only technical skills.

**We are part of a wonderful story** / We are one of the companies that make the Romanian IT the success that it is today. The Romanian IT market has grown 10 times over the past 15 years, and we have been here to be a part of it all the way. We are also one of the first IT companies in Iasi, so how great is that!

**Join our team now! We look forward to meeting you!**

#### • Interview online

- 1. Please provide an example of an application created by you. 2. What frameworks have you used for back-end and front-end since now? 3. What other technologies have you worked with? 4. What is your English level? 5. What are your salary expectations?

You have mastered more than one technology stack in your life, and you are comfortable with the idea of mastering several more?

We are looking for a Java Software Engineer who can turn ideas into extremely reliable, beautifully written code, who will be part of a cross-functional team that's responsible for the full software development life cycle, from conception to deployment.

**Responsibilities:**

- Implement and contribute to engineering practices and processes
- Work with development teams and product managers to ideate software solutions
- Design client-side and server-side architecture
- Develop and manage well-functioning databases and applications
- Write effective APIs
- Test software to ensure responsiveness and efficiency
- Troubleshoot, debug and upgrade software
- Create security and data protection settings
- Build features and applications with a mobile responsive design
- Write technical documentation
- Work with data scientists and analysts to improve software
- Maintain quality and ensure the responsiveness of applications.
- Maintain code integrity and organisation.
- Experience working with graphic designers and converting designs to visual elements.
- Understanding and implementation of security and data protection.

**What you need to bring:**

- **BS/MS/PhD in Computer Science, Computer Engineering or a related field**
- Demonstrated successes from current or past technical challenges
- Experience with modern DevOps and agile development processes
- **4+ years of relevant experience**
- Highly experienced with backend programming languages ( Java, JavaScript)
- Proficient experience using advanced JavaScript libraries, GWT
- Knowledge of code versioning tools (Git, Mercurial or SVN)
- Experience with design and development of modern distributed applications
- REST API development using Java
- Experience with modern data processing techniques such as Spark, Kafka
- Microservice architectures and deployment methodologies
- Performance modelling and troubleshooting
- Experience with SQL and NoSQL Database technologies
- Understanding of Linux and Container technologies
- Team-player, flexible and able to work in a fast-paced environment
- Experience with Cassandra, Postgres and ElasticSearch desired

**The company**

VeracityID, Inc. is a SaaS, 'big data' company focused on providing real-time fraud detection and intervention services to the Financial Industry – with a particular focus on the Global Re-tail Insurance Industry.

Founded in, VeracityID's services platform leverages leading-edge graph databases, relational databases, ElasticSearch, Machine Learning, Mobile and other technologies into an integrated platform – **idFusion**.

idFusion combines live production data with (historical) graph and structured data sets into a lifecycle view of policies and carrier books, to help insurers automate analytics and interventions and critical decision processes at the point of sale and throughout the product lifecycle.

### What we do:

Our application engineering team is seeking a smart and passionate web developer with good understanding of software architecture and design issues, as well as :

- solid knowledge of Backend technologies
- strong MVC architecture knowledge
- adequate knowledge of Frontend technologies (Angular2, Typescript and HTML5)

As part of our team, your responsibilities will include:

- planning and prototyping a new application

- building and testing Application Program Interfaces (APIs) for applications to exchange data
- refactoring and optimizing existing code
- fixing bugs in existing code
- writing unit tests
- writing documentation

**Requested technical competence:**

- Bachelor Degree in Computer Science or similar degree
- Web Services (REST)
- Web technologies (Angular2, Typescript and HTML5)
- Linux skills (scripting, configuring)
- Excellent knowledge in Object Oriented Programming.
- Version control experience required
- Strong knowledge of Javascript, HTML, CSS and related tools/packages
- Strong knowledge of relational databases & / or non relational databases
- Good understanding of software architecture and design
- Advanced level of written and spoken English

**Knowledge of the following is a plus:**

- C++ development skills
- Scripting languages knowledge
- NodeJS, Express, Npm, Angular
- Cloud architecture ( AWS / Azure / Google Cloud )
- ReactJS / React Native / GraphQL
- Know-how on: routing, TCP/IP, sockets
- Databases (SQL) knowledge
- NoSql knowledge
- Exposure to Python / Perl / Ruby would be a plus
- Experience in process oriented development (V-Model, Agile methods)

**Benefits**

- A challenging job in a dynamic environment;
- Medical Insurance
- Attractive salary package.
- Flexible working hours
- Exciting projects
- New Technologies
- Access to various training programs

**Our Company**

Founded in, Next Logic is a young, agile highly exigent team which has motivated us and pushed us to constantly evolve.

Our main focus are high-end web applications as well as mobile.

We look forward for you to join our ranks.

## Must have:

- Very good knowledge of C/C++ embedded software development
- 5+ years in automotive industry
- Good understanding of embedded architectures and interfacing
- Knowledge of automotive-grade microcontroller architecture and operating systems
- Use of embedded software tools: assemblers, compilers, linkers, debuggers, profilers, etc.
- Comfortable with using measurement and diagnosis equipment: logic analyzers, oscilloscopes, signal generators
- Car communication protocols and tools: CAN, LIN, Flexray, CANoe, etc.
- Knowledge of ASPICE needs and the Automotive process
- AUTOSAR architecture
- Software debug, test, optimize, maintenance
- Team player, good communication in English
- Ability to perform test activities, process related documentation
- Exposure to test environments
- Ability to adapt to new technologies and incompletely specified environments

**Nice to have:**

- C#
- Python or other scripting language
- Engineering tools: MATLAB, Simulink, UML

**Job description:**

We are looking for a dynamic, experienced front-end web developer to join our team. The right candidate will have the opportunity to help influence the direction and architecture of the user interface as well feed in to the design and flow of the user experience.

**General skills and competencies:**

1. 5+ years of professional development experience
2. Ability to work independently or as a member of a team
3. Demonstrated strong attention to detail

4. Excellent UI/UX design skills
5. Experience using Material design
6. Experience with source control (GIT), build and deployment tools
7. Good verbal and written communication skills , including working with internal stakeholders
8. A proven ability to solve problems and pick up new technology quickly.

Required technical skills:

1. 3+ years of experience developing front-end web applications
2. Web UI technologies including HTML5, CSS3, significant Javascript, including ES6 and JQuery
3. Use of VueJS for a released product
4. Experience of various other frameworks such as React, Angular etc.
5. Practised in the use of Adobe products including XD, Photoshop and Illustrator
6. Experience in creating required widgets that may be missing from a theme
7. Able to work with and feed into design of ReST API specifications

Desirable technical skills:

1. Vuetify
2. Experience in use of automated UI testing tools
3. DevOps experience, including CI/CD (Ideally in Azure)
4. Use of TDD
5. Exposure to WordPress a nice to have

**Salary and benefits will be discussed during the recruitment process.**

Dragi programatori,

Compania noastra cu sediul in Iasi angajeaza 7 programatori Seniori si Juniori oferind salarii de peste \$3000/luna.

Ce trebuie sa stii ?

Cunostinte de baza JAVA sau J2EE.

Doar atat....pentru ca de progresele dumneavoastra se va ocupa o echipa de seniori.  
Prezinta un avantaj experienta anterioara cu oricare din urmatoarele tehnologii : Spring, Solr, Elastic Search, Lucene, Spring Boot, Hibernate, JUnit / TestNG, JMS, Maven, Jenkins, AWS, Docker, Jira, ATDD Selenium, Gherkin, Cucumber.

Daca tehnologiile de mai sus va sunt cunoscute sau daca doriti sa le invatati, nu mai stati pe ganduri, trimiteti CV-ul pentru a fi contactati si vom programa impreuna un interviu.

Oferta (bonusuri, beneficii)

Oferim:

- Sediul firmei este in Centrul lasului, langa Palas
- Salariu motivant (!!! 2500E – 3500E !!! in functie de cunostinte si experienta)
- Sediul firmei e mare, nou, modern si bine mobilat
- Program flexibil pentru studenti
- Abonament servicii medicale gratuite la spitalul privat Arcadia
- Calatorii cu avionul si cazare la hotel de lux pentru intalnirile cu clientii din Europa, SUA sau Australia, ceea ce reprezinta o ocazie extraordinara de a cunoaste noi oameni si locatii.
- Lucrul se desfasoara folosind sisteme foarte performante 4K
- Masa de ping-pong pentru miscare ...
- Imprimanta 3D pentru printari personalizate (brelocuri, miniaturi, sigle cu numele fiecaruia)
- Conditii de lucru excelente intr-un mediu tanar si dinamic

- **Interviu online**

- Cati ani de lucru efectiv cu limbajul JAVA aveti ?
- Descrieti functionalitati implementate de dumneavoastra in diverse aplicatii folosind JAVA sau SPRING (boot, mvc, aop, orm).(Doar candidatii care raspund la aceasta intrebare vor fi chemati la interviu iar, experienta in JAVA SE este obligatorie).

We are looking for a Devops Engineer to join our tremendous team.

### This is how your day-to-day will go

- build the ultimate self-service environment for over 150 developers
- create and nurture new ways to deliver secure, reliable and highly available, business critical software
- help us spread the DevOps love and culture throughout the company
- provide custom solutions for custom projects, as an autonomous engineer and as part of our team

- build infrastructure as code from the ground-up
- provide support for our teams and clients
- be Agile, breathe Agile and discover the fun in Agile

### **Do you know how to play with these things?**

(don't worry if you haven't experienced all of them, none of us did)

#### Ops & Infrastructure

- Advanced Linux setup & operation
- Advanced networking setup & monitoring
- System and network security & incident mitigation
- System reliability, high-availability solutions
- Distributed file systems: GlusterFS, Ceph
- Caching solutions: Varnish, Redis, Memcache

#### Provisioning

- Ansible, Chef, Puppet
- Terraform
- Saltstack

#### Cloud

- AWS (EC2, RDS, SQS, S3, SNS, EKS, ECS, Route53, CodeDeploy, ELB, ALB, ASG, IAM, Lambda)
- GCP (Compute Engine, GKE, Cloud Storage, Cloud DNS, Cloud SQL, LB)
- Extensive Azure experience (hands-on with most PaaS Azure resources, Azure management and monitoring, etc) and/or Azure certifications are a desirable option.

#### CI / CD

- SCM: Gitlab, Bitbucket, Github
- CI pipelines
- Jenkins, Bamboo
- Artifact management
- SonarQube

#### Deployment

- Docker, Docker Compose
- Orchestrators: Kubernetes, Rancher
- CoreOS, Tectonic
- DC/OS, Apache Mesos
- OpenStack
- CDNs

#### Monitoring, performance

- ELK stack
- Prometheus
- Nagios, Zabbix
- Grafana, Graphite, statsd
- JMeter
- New Relic

#### Programming

- Bash
- Python
- basic understanding of how Java, , Golang, PHP operate

#### DB

- Setup, operate and troubleshoot SQL: MySQL, PostgreSQL, Oracle, MSSQL
- NoSQL: MongoDB, Couchbase, Redis, Elasticsearch, ArangoDB

## INGINER DE DEZVOLTARE – SOFTWARE/FIRMWARE (b/f/d)

Suntem o companie cu o ascensiune dinamică, producător de binocluri, lunete și produse optoelectronice cu standarde înalte de calitate, care impune de ani de zile standardele în industria noastră și în segmente de piață precum vânătoria, sporturile acvatice, sporturile în aer liber și în domeniul apărării și respectării legii. Standardele noastre ridicate de inovare, calitatea și orientarea către client, ne-au ajutat să obținem performanțele dorite de compania noastră.

Cu experiența și competențele dumneavoastră, vă invităm să vă alăturați echipei noastre.

### INGINER DE DEZVOLTARE – SOFTWARE/FIRMWARE (b/f/d)

Steiner caută un inginer experimentat și creativ care să facă parte din echipa noastră de dezvoltare a produselor multidisciplinare, în special a produselor optoelectronice. Candidatul ideal trebuie să fie o persoană motivată și un bun partener de echipă. Această poziție cheie va susține viziunea noastră strategică inovatoare.

#### Îndatoriri:

- Proiectarea, implementarea și validarea programelor software integrate
- Managementul proiectelor din punct de vedere al dezvoltării software
- Întreținerea programelor software existente, inclusiv rezolvarea bugurilor, actualizarea produselor și noile versiuni ale programelor software
- Cunoștințe de dezvoltare a programelor firmware utilizând Embedded C și/sau C++ în mediul de producție cât și experiență de lucru cu controlerele ARM, seria Cortex M sau cu produse similare
- Bună cunoaștere a unor protocoale precum: I2C, SPI, USB, SDRAM/FLASH, RS232, SDIO
- Experiență în dezvoltarea aplicațiilor wireless cu Wi-Fi și Bluetooth (BLE)
- O foarte bună înțelegere a Software Development Life Cycle (SDLC) și a instrumentelor asociate
- Experiență în utilizarea instrumentelor de testare pentru validarea sistemelor integrate într-un mediu de laborator
- Să lucreze în strânsă colaborare cu echipele care lucrează la proiectele respective

#### Cerințe:

- Diplomă de absolvire a facultății (de ex. informatică, electrotehnică sau echivalent) sau o calificare similară
- Câțiva ani de experiență profesională în dezvoltarea sistemelor integrate
- Persoană cu multă inițiativă, cu aptitudini de comunicare interpersonale și în echipă
- Pasionat de tehnologie: întotdeauna la curent cu noutățile, capabil să recunoască cele mai recente tehnologii și trenduri și să le evalueze potențialul.
- Experiență în procesele imagistice / optoelectronice
- O bună cunoaștere a limbii engleze și a limbii germane
- Disponibilitate pentru călătorii, în special în SUA și în China

#### • **Interviu online**

- Pentru mai multe informații despre acest post extrem de interesant, vă rugăm să ne trimiteți documentele pentru candidatura dumneavoastră, precizând data la care puteți începe activitatea și așteptările salariale

Aplica

## Software Developer Generic Memory Services

Vitesco Technologies Engineering Romania SRL

Programator Embedded C Microcontrollers

Nivelul carierei

Entry (0-2 ani), Middle (2-5 ani)

**Tip job**

Full time

**Limbi vorbite**

engleză - avansat

**Adresa**

Calea Chișinăului, Iași

**Posturi disponibile**

1

**Job Description**

Are you experimenting with microcontrollers for fun and Embedded C is your second language ?

Do terms like "Over the Air Reprogramming", "Non-volatile memory data handling" or "System Boot Management" sound appealing to you ?

We are looking for talented and motivated software developers to join our team and we think you might be the perfect fit!

Who are we ?

Vitesco Technologies is more than just a brand. It is a statement.

We lead the way to electrification and electromobility with full commitment and a clear goal.

With smart system solutions and components for electric, hybrid and internal combustion drivetrains, Vitesco Technologies makes mobility clean, efficient and affordable.

The product range includes electrified drivetrain systems for classic, hybrid and full electric engines, electronic control units, and exhaust-gas aftertreatment solutions for known OEMs such as: BMW, Daimler, Renault, Ford, Nissan.

We think ahead and we combine decades of technological experience, curiosity, innovative power and highest levels of quality standards with the courage to shape new paths.

Enough about us, let's talk about you!

While working with us you will:

- Analyze and understand customer requirements
- Design, code and debug on the target microcontroller
- Integrate modules using a source control tool and fix integration problems

- Interact with the latest automotive technologies and products that haven't been released on the market yet
- Develop your technical skills
- Work in international teams together with colleagues from all around the world

A mentor will guide you step by step so you will know everything about our products, tools, processes and organization.

### **Job Requirements**

- University Degree in a relevant field (Computer Science, Electronics and Telecommunication, Informatics etc.)
- Good C embedded programming skills
- Microcontrollers knowledge
- Fluency in English
- Skills: problem solving, result oriented, good communication skills, ability to analyze and organize, team player
- Microcontrollers knowledge

Would be a plus:

- Embedded systems knowledge and experience in the automotive industry is a plus
- AutoSAR Architecture know-how is a plus
- Cryptography know-how is a plus

### **What we offer**

- Integration program in a professional and dynamic team
- Attractive salaries & benefits
- Professional development opportunities
- Health & Wellness
- Stability
- International work environment and traveling opportunities
- Relocation package for non-lasi residents

Not yet convinced ? Get in touch with us and let's meet !
